

Consultation

Use our experience in Tissue Viability Imaging to solve your problems.

We work in close collaboration with our clients - under Confidential Agreement - with the aim to evaluate an existing skin care product or work-site process or in the analysis of a product or work-site process under development.

Our engagement in your project may include:

1. Assistance in the design of your study.
2. On-site capturing of photos.
3. Analysis of data.
4. Report generation.
5. Follow-up discussions.

Contact us for further discussions.
